Provide Reiki to clients

Overview

The practice of Reiki is an original method of healing, developed by Mikao Usui in Japan early in the 20th century. Reiki is a natural healing energy that works on every level, not just the physical, and is understood to promote the body's regenerative self healing ability. This standard is about providing Reiki to clients. Reiki is non-invasive and is used holistically to restore balance in mind body and spirit. Users of this standard will need to ensure that practice reflects up to date information and policies.
